

TYNDALL AIR FORCE BASE BOMB CRATER REPAIR GEOWEB® LOAD SUPPORT SYSTEM

Contact: Capt. Kevin Osborne
Company: US Air Force – Malstrom Air Force Base, MT
Ph: 406-731-4594

US Military uses GEOWEB as expedient bomb crater runway repair system

Through extensive testing at US Air Force base in Tyndall, FL the Red Horse squadron has developed a two layer GEOWEB bomb crater repair method that allows bomb crater damaged runways to be put back in service within hours. The repaired runways have the capability of handling C130 Hercules aircraft to F-14 fighter jets.
